

Did you know that you have the right to refuse to dissect animals in the Northwest Territories?

It's true! Each year, countless animals (including frogs, cats, and fetal pigs) are cruelly killed and then cut up in classrooms across the country—even though humane alternatives exist. Studies have shown that students who use alternatives to dissection perform just as well as—if not better than—students who cut up animals. You don't have to dissect animals! Explain to your teacher that you won't be dissecting and that the law [*Statutes of the Northwest Territories, Education Act, 1995*] gives you the right to say "No!" to cutting up animals in the Northwest Territories:

Every teacher shall, respecting the students under his or her care and instruction, ... implement the education program and individual education plans in a way that ... encourages students to respect other students' cultural and spiritual or religious values and beliefs.
[*Statutes of the Northwest Territories, Education Act, 1995*]

Dissection is unnecessary and cruel. Stand up for animals, and exercise your rights. Choose not to dissect.
